UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
Comprehensive Assessment Information Rule
REPORTING FORM

89 JUL -5 AM 9:54
OFFICE OF TOXIC SUBSTANCES
CONTROL

When completed, send this form to:

Document Processing Center
Office of Toxic Substances, TS-790
U.S. Environmental Protection Agency
401 M Street, SW
Washington, DC 20460
Attention: CAIR Reporting Office

For Agency Use Only:

Date of Receipt: _____

Document
Control Number: _____

Docket Number: _____

SECTION 1 GENERAL MANUFACTURER, IMPORTER, AND PROCESSOR INFORMATION

PART A GENERAL REPORTING INFORMATION

1.01 This Comprehensive Assessment Information Rule (CAIR) Reporting Form has been

completed in response to the Federal Register Notice of..... [1][2] [2][2] [8][8]
CBI mo. day year

☐ a. If a Chemical Abstracts Service Number (CAS No.) is provided in the Federal Register, list the CAS No. [1][2][6][4][7][7][1]-[6][2]-[5]

b. If a chemical substance CAS No. is not provided in the Federal Register, list either (i) the chemical name, (ii) the mixture name, or (iii) the trade name of the chemical substance as provided in the Federal Register.

(i) Chemical name as listed in the rule _____

(ii) Name of mixture as listed in the rule _____

(iii) Trade name as listed in the rule _____

c. If a chemical category is provided in the Federal Register, report the name of the category as listed in the rule, the chemical substance CAS No. you are reporting on which falls under the listed category, and the chemical name of the substance you are reporting on which falls under the listed category.

Name of category as listed in the rule _____

CAS No. of chemical substance [1][2][6][4][7][7][1]-[6][2]-[5]

Name of chemical substance _____

1.02 Identify your reporting status under CAIR by circling the appropriate response(s).

CBI Manufacturer 1

☐ Importer 2

Processor ③

X/P manufacturer reporting for customer who is a processor 4

X/P processor reporting for customer who is a processor 5

☐ Mark (X) this box if you attach a continuation sheet.

1.03 Does the substance you are reporting on have an "x/p" designation associated with it in the above-listed Federal Register Notice?

CBI

Yes ☒ Go to question 1.04

☐

No ☐ Go to question 1.05

1.04 a. Do you manufacture, import, or process the listed substance and distribute it under a trade name(s) different than that listed in the Federal Register Notice? Circle the appropriate response.

CBI

Yes 1

☐

No (2)

b. Check the appropriate box below:

☐ You have chosen to notify your customers of their reporting obligations

Provide the trade name(s)

☐ You have chosen to report for your customers

☐ You have submitted the trade name(s) to EPA one day after the effective date of the rule in the Federal Register Notice under which you are reporting.

1.05 If you buy a trade name product and are reporting because you were notified of your reporting requirements by your trade name supplier, provide that trade name.

CBI

Trade name ANDUR, ADIPRENE

☐

Is the trade name product a mixture? Circle the appropriate response.

Yes (1)

No 2

1.06 Certification -- The person who is responsible for the completion of this form must sign the certification statement below:

CBI

"I hereby certify that, to the best of my knowledge and belief, all information entered on this form is complete and accurate."

☐

1.13 This reporting year is from [] 9 [8] 7 to [] 8 [8] 8
Mo. Year Mo. Year

☐ Mark (X) this box if you attach a continuation sheet.

1.16 For each classification listed below, state the quantity of the listed substance that was manufactured, imported, or processed at your facility during the reporting year.

CBI

☐ Classification Quantity (kg/yr)

Manufactured _____

Imported _____

Processed (include quantity repackaged) _____

Of that quantity manufactured or imported, report that quantity:

In storage at the beginning of the reporting year _____

For on-site use or processing _____

For direct commercial distribution (including export) _____

In storage at the end of the reporting year _____

Of that quantity processed, report that quantity:

In storage at the beginning of the reporting year _____

Processed as a reactant (chemical producer) _____

Processed as a formulation component (mixture producer) _____

Processed as an article component (article producer) 52,000

Repackaged (including export) _____

In storage at the end of the reporting year _____

☐ Mark (X) this box if you attach a continuation sheet.

2.04 State the quantity of the listed substance that your facility manufactured, imported, or processed during the 3 corporate fiscal years preceding the reporting year in descending order.

CBI

☐ Year ending ☐ 8 ☐ 8 ☐ 6
Mo. Year

Quantity manufactured kg

Quantity imported kg

Quantity processed 48,000 kg

Year ending ☐ 8 ☐ 8 ☐ 7
Mo. Year

Quantity manufactured kg

Quantity imported kg

Quantity processed 50,000 kg

Year ending ☐ 8 ☐ 8 ☐ 8
Mo. Year

Quantity manufactured kg

Quantity imported kg

Quantity processed 52,000 kg

2.05 Specify the manner in which you manufactured the listed substance. Circle all appropriate process types.

CBI

☐ Continuous process 1
Semicontinuous process 2
Batch process 3

N.A.

☐ Mark (X) this box if you attach a continuation sheet.

2.06 Specify the manner in which you processed the listed substance. Circle all appropriate process types.

☐

Continuous process 1

Semicontinuous process 2

Batch process 3

2.07 State your facility's name-plate capacity for manufacturing or processing the listed substance. (If you are a batch manufacturer or batch processor, do not answer this question.)

CBI

☐

Manufacturing capacity kg/yr

Processing capacity kg/yr

2.08 If you intend to increase or decrease the quantity of the listed substance manufactured, imported, or processed at any time after your current corporate fiscal year, estimate the increase or decrease based upon the reporting year's production volume.

CBI

☐

	Manufacturing Quantity (kg)	Importing Quantity (kg)	Processing Quantity (kg)
Amount of increase			23,000
Amount of decrease			

☐ Mark (X) this box if you attach a continuation sheet.

2.09 For the three largest volume manufacturing or processing process types involving the listed substance, specify the number of days you manufactured or processed the listed substance during the reporting year. Also specify the average number of hours per day each process type was operated. (If only one or two operations are involved, list those.)

CBI

☐

Days/Year Average
Hours/Day

Process Type #1 (The process type involving the largest quantity of the listed substance.)

Manufactured

Processed 200 20

Process Type #2 (The process type involving the 2nd largest quantity of the listed substance.)

Manufactured

Processed 200 20

Process Type #3 (The process type involving the 3rd largest quantity of the listed substance.)

Manufactured

Processed

2.10 State the maximum daily inventory and average monthly inventory of the listed substance that was stored on-site during the reporting year in the form of a bulk chemical.

CBI

☐

NA

Maximum daily inventory kg

Average monthly inventory kg

☐ Mark (X) this box if you attach a continuation sheet.

- 2.12 Existing Product Types -- List all existing product types which you manufactured, imported, or processed using the listed substance during the reporting year. List the quantity of listed substance you use for each product type as a percentage of the total volume of listed substance used during the reporting year. Also list the quantity of listed substance used captively on-site as a percentage of the value listed under column b., and the types of end-users for each product type. (Refer to the instructions for further explanation and an example.)

CBI

☐

a.	b.	c.	d.
Product Types ¹	% of Quantity Manufactured, Imported, or Processed	% of Quantity Used Captively On-Site	Type of End-Users ²
L	100	0	I

¹Use the following codes to designate product types:

A = Solvent	L = Moldable/Castable/Rubber and additives
B = Synthetic reactant	M = Plasticizer
C = Catalyst/Initiator/Accelerator/ Sensitizer	N = Dye/Pigment/Colorant/Ink and additives
D = Inhibitor/Stabilizer/Scavenger/ Antioxidant	O = Photographic/Reprographic chemical and additives
E = Analytical reagent	P = Electrodeposition/Plating chemicals
F = Chelator/Coagulant/Sequestrant	Q = Fuel and fuel additives
G = Cleanser/Detergent/Degreaser	R = Explosive chemicals and additives
H = Lubricant/Friction modifier/Antiwear agent	S = Fragrance/Flavor chemicals
I = Surfactant/Emulsifier	T = Pollution control chemicals
J = Flame retardant	U = Functional fluids and additives
K = Coating/Binder/Adhesive and additives	V = Metal alloy and additives
	W = Rheological modifier
	X = Other (specify) _____

²Use the following codes to designate the type of end-users:

I = Industrial	CS = Consumer
CM = Commercial	H = Other (specify) _____

☐ Mark (X) this box if you attach a continuation sheet.

- 2.13 Expected Product Types -- Identify all product types which you expect to manufacture, import, or process using the listed substance at any time after your current corporate fiscal year. For each use, specify the quantity you expect to manufacture, import, or process for each use as a percentage of the total volume of listed substance used during the reporting year. Also list the quantity of listed substance used captively on-site as a percentage of the value listed under column b., and the types of end-users for each product type. (Refer to the instructions for further explanation and an example.)

CBI

☐

a.	b.	c.	d.
Product Types ¹	% of Quantity Manufactured, Imported, or Processed	% of Quantity Used Captively On-Site	Type of End-Users ²
L	100	0	I

¹Use the following codes to designate product types:

A = Solvent	L = Moldable/Castable/Rubber and additives
B = Synthetic reactant	M = Plasticizer
C = Catalyst/Initiator/Accelerator/ Sensitizer	N = Dye/Pigment/Colorant/Ink and additives
D = Inhibitor/Stabilizer/Scavenger/ Antioxidant	O = Photographic/Reprographic chemical and additives
E = Analytical reagent	P = Electrodeposition/Plating chemicals
F = Chelator/Coagulant/Sequestrant	Q = Fuel and fuel additives
G = Cleanser/Detergent/Degreaser	R = Explosive chemicals and additives
H = Lubricant/Friction modifier/Antiwear agent	S = Fragrance/Flavor chemicals
I = Surfactant/Emulsifier	T = Pollution control chemicals
J = Flame retardant	U = Functional fluids and additives
K = Coating/Binder/Adhesive and additives	V = Metal alloy and additives
	W = Rheological modifier
	X = Other (specify) _____

²Use the following codes to designate the type of end-users:

I = Industrial	CS = Consumer
CM = Commercial	H = Other (specify) _____

☐ Mark (X) this box if you attach a continuation sheet.

SECTION 3 PROCESSOR RAW MATERIAL IDENTIFICATION

PART A GENERAL DATA

3.01 Specify the quantity purchased and the average price paid for the listed substance for each major source of supply listed. Product trades are treated as purchases.
CBI The average price is the market value of the product that was traded for the listed substance.

☐

<u>Source of Supply</u>	<u>Quantity (kg)</u>	<u>Average Price (\$/kg)</u>
The listed substance was manufactured on-site.		
The listed substance was transferred from a different company site.		
The listed substance was purchased directly from a manufacturer or importer.	<u>52,000</u>	<u>4.83</u>
The listed substance was purchased from a distributor or repackager.		
The listed substance was purchased from a mixture producer.		

3.02 Circle all applicable modes of transportation used to deliver the listed substance to your facility.

CBI

☐

- Truck ①
- Railcar 2
- Barge, Vessel 3
- Pipeline 4
- Plane 5
- Other (specify) _____ 6

☐ Mark (X) this box if you attach a continuation sheet.

3.03 a. Circle all applicable containers used to transport the listed substance to your facility.
CBI

☐

Bags 1
Boxes 2
Free standing tank cylinders 3
Tank rail cars 4
Hopper cars 5
Tank trucks 6
Hopper trucks 7
Drums 8
Pipeline 9
Other (specify) _____ 10

b. If the listed substance is transported in pressurized tank cylinders, tank rail cars, or tank trucks, state the pressure of the tanks.

Tank cylinders mmHg
Tank rail cars mmHg
Tank trucks mmHg

☐ Mark (X) this box if you attach a continuation sheet.

PART C RAW MATERIAL VOLUME

3.05 State the quantity of the listed substance used as a raw material during the reporting year in the form of a class I chemical, class II chemical, or polymer, and the percent composition, by weight, of the listed substance.

☐

	Quantity Used (kg/yr)	% Composition by Weight of Listed Sub- stance in Raw Material (specify \pm % precision)
Class I chemical	52,000	1.1 \pm 15 E
Class II chemical		
Polymer		

E = Engineering Estimate

☐ Mark (X) this box if you attach a continuation sheet.

SECTION 4 PHYSICAL/CHEMICAL PROPERTIES

General Instructions:

If you are reporting on a mixture as defined in the glossary, reply to questions in Section 4 that are inappropriate to mixtures by stating "NA -- mixture."

For questions 4.06-4.15, if you possess any hazard warning statement, label, MSDS, or other notice that addresses the information requested, you may submit a copy or reasonable facsimile in lieu of answering those questions which it addresses.

PART A PHYSICAL/CHEMICAL DATA SUMMARY

- 4.01 Specify the percent purity for the three major¹ technical grade(s) of the listed substance as it is manufactured, imported, or processed. Measure the purity of the substance in the final product form for manufacturing activities, at the time you import the substance, or at the point you begin to process the substance.

☐ CBI

	<u>Manufacture</u>	<u>Import</u>	<u>Process</u>
Technical grade #1	_____ % purity	_____ % purity	_____ % purity
Technical grade #2	_____ % purity	_____ % purity	_____ % purity
Technical grade #3	_____ % purity	_____ % purity	_____ % purity

¹Major = Greatest quantity of listed substance manufactured, imported or processed.

- 4.02 Submit your most recently updated Material Safety Data Sheet (MSDS) for the listed substance, and for every formulation containing the listed substance. If you possess an MSDS that you developed and an MSDS developed by a different source, submit your version. Indicate whether at least one MSDS has been submitted by circling the appropriate response.

Yes 1

No 2

Indicate whether the MSDS was developed by your company or by a different source.

Your company 1

Another source 2

☐ Mark (X) this box if you attach a continuation sheet.

TELEPHONE NUMBER: (517) 263-2121

THIS MSDS COMPLIES WITH 29 CFR 1910.1200 (THE HAZARD COMMUNICATION STD.)

SECTION I IDENTIFICATION

PRODUCT NAME:	Andur Prepolymer (-AP, -DP, AL-, -AS/Part A Designations)		
CHEMICAL NAME:	Isocyanate Terminated Prepolymer	CHEMICAL FAMILY:	Diisocyanate
FORMULA:	Polymeric	T.S.C.A. STATUS:	Yes 1980
SYNONYMS:	Aromatic and Aliphatic Diisocyanates		
DEPARTMENT OF TRANSPORTATION	HAZARD CLASSIFICATION	Not -Regulated	
	SHIPPING NAME	Plastic Material Liquid, NOI	
CAS #	Not Applicable	CAS NAME	This MSDS Represents Various Diisocyanates

SECTION II HAZARDOUS COMPONENTS

MATERIAL	%	TLV (Units)	HAZARD
Isocyanate Monomer	<3	0.02 ppm	Highly Toxic Vapors

SECTION III PHYSICAL DATA

Melting point	Not Known	Specific Gravity (H ₂ O = 1)	1.07 ±0.05
Boiling point	Above 450°F	Solubility in H ₂ O, % by WT	Reacts
Vapor pressure	0.0003 @20°C	% Volatiles by Volume	<2
Vapor Density (Air = 1)	6	Evaporation rate (butyl acetate = 1)	0 - Reacts Air Humidity
Room temperature: appearance & state	Light Yellow Liquid	pH (as is)	Not Applicable
Odor	Slight Isocyanate	pH (1% solution)	Not Applicable

MSDS # 0003

SECTION IV FIRE AND EXPLOSION DATA

Flash point 325°F (COC)	Flammable Limits (air)	Upper	Not Known
Autoignition temp. Not Known		Lower	Not Known
Extinguishing media <input checked="" type="checkbox"/> Water <input checked="" type="checkbox"/> Water Fog <input checked="" type="checkbox"/> CO ₂ <input checked="" type="checkbox"/> Dry Chemical <input type="checkbox"/> Other _____			
Special fire fighting procedures Highly toxic gases. Wear self-contained breathing apparatus.			
Degree of fire and explosion hazard Slight chance of initiating fire. High risk fire fighting. Close containers may explode from extreme heat or water contamination.			
<input checked="" type="checkbox"/> Stable <input type="checkbox"/> Unstable <input type="checkbox"/> Hazardous Polymerization <input type="checkbox"/> May Occur <input checked="" type="checkbox"/> Will Not Occur			
Conditions to Avoid High temperatures.			
Major contaminates that may contribute to instability See Incompatibility.			
Incompatibility Water, Alcohols, Amines, Alkali, Metal Compounds, Surfactants			
Hazardous decomposition products Traces of Hydrogen Cyanide, Carbon Dioxide, Carbon Monoxide, Nitrogen Oxides, Monomeric Isocyanate			

SECTION V SPECIAL PROTECTION

Ventilation requirements	Local to maintain vapor conc. below TLV.
Recommended personal protective equipment:	See specifics below.
Respiratory (Specify conditions)	Normal Conc.: Canister (organic). High Conc.: Self-Contained (air).
Eyes	Safety Glasses. Contact lenses should not be worn.
Gloves	Chemical resistant rubber or plastic.
Special clothing and equipment	Safety showers, eye-wash.

SECTION VI SPILL CONTROL

Procedure for release or spill	Evacuate non-essential personnel (toxic vapors). Ventilate area and cover spill with absorbent. Decontaminate with a dilute base. Collect material in open containers and treat with additional base.
Waste disposal method	In accordance with Federal, State and Local Regulations. Prior to disposal, decontaminate empty containers due to product residue.
Neutralizing chemicals	Dilute base preferably a solution of 10% ammonium hydroxide in water.

SECTION VII HEALTH EFFECTS DATA

TLV AND SOURCE: Occupational exposure to diisocyanates. TLV = 0.02 ppm; TWA = 5 ppm; SAX 6 Ed.	
ACUTE EFFECTS OF OVEREXPOSURE	
SWALLOWING	Monomeric isocyanate. Oral Rat-LD ₅₀ : 5800 mg/kg.
SKIN ABSORPTION	Allergic Dermatitis including rash, itching, hives and swelling.
INHALATION	Monomeric isocyanate injurious to lungs and pulmonary edema may occur.
SKIN CONTACT	Irritation and itching.
EYE CONTACT	Monomer isocyanate eye rbt 100 mg. Severe damage. Watering of eyes.
CHRONIC EFFECTS OF OVEREXPOSURE	Extreme sensitivity may result.
OTHER HEALTH HAZARDS	Allergic reaction in some individuals.
EMERGENCY AND FIRST AID PROCEDURES:	
SWALLOWING	See Physician Immediately.
SKIN	Remove contaminated clothing. Wash affected area with soap and water.
INHALATION	Move from area of exposure. Administer oxygen.
EYES	Eyewash flush - see Physician.

ALTHOUGH THE INFORMATION AND RECOMMENDATIONS SET FORTH HEREIN (HEREINAFTER "INFORMATION") ARE PRESENTED IN GOOD FAITH AND BELIEVED TO BE CORRECT AS OF THE DATE HEREOF, ANDERSON DEVELOPMENT COMPANY MAKES NO REPRESENTATIONS AS TO THE COMPLETENESS OR ACCURACY THEREOF. MATERIAL SAFETY DATA SHEET

I. IDENTIFICATION

Trade Name: ADIPRENE®*

CAS Number: NA

Chemical Name(s): Reaction product of a polyether with toluene diisocyanate (TDI)

Chemical Family: Polyurethane

DOT Ident. No.: NA

*Applicable to L-42, L-83, L-100, L-167, L-200, L-213, L-300, L-315, L-367, L-700, L-767 and AP-R-882.

DOT Hazard Class: NA

DOT Proper Shipping Name: NA

II. PHYSICAL DATA

Appearance: Honey-colored liquid

Melting Point: NA

Odor: Slight

Boiling Point: NA

Solubility

Specific Gravity (H₂O = 1): 1.03-1.15

Water: Reacts with water
Other: Soluble in THF, DMF or methylene chloride

Vapor Pressure @ 20° C: ND

Vapor Density (Air = 1): ND

pH: NA

Volatility @ 70° F: Low

Other Data:

III. FIRE AND EXPLOSION HAZARD DATA

Flash Point: > 177°C (350°F) CC

Autoignition Temp: ND

Extinguishing Media: Water spray, CO₂ or dry chemical

Flammable Limits in Air: ND

Special Fire Fighting Procedures: Protect against inhalation of cyanate vapors & other decomposition/combustion products.

Unusual Hazards: None

IV. REACTIVITY DATA

Stability: Stable at ambient temperatures and pressures.

Incompatibility: Avoid contamination with water, strong oxidizers, alcohol or amines.

Decomposition Products: High temperatures will release cyanates & hydrocarbons. Under burning conditions - oxides of carbon & nitrogen, small amounts of HCN.

Uniroyal makes no representation or warranty with respect to the information in this Material Safety Data Sheet. The information is however, as of this date provided, true and accurate to the best of Uniroyal's knowledge. This list of information is not intended to be all inclusive. Actual conditions of use and handling

SPECIAL PROTECTION INFORMATION

Engineering Controls: Local exhaust ventilation strongly recommended. Product contains residual TDI which has an OSHA limit of 0.02 ppm under 29 CFR 1910.1000. ACGIH, TLV: 0.005 ppm.

Personal Protection Equipment: Impervious gloves & goggles should be worn. Avoid all contact with eyes, skin & clothing. Avoid breathing vapors. In the absence of good ventilation, under emergency situations or for high concentrations, self-contained or air-supplied respiratory protection is recommended.

VI. STORAGE, SPILLS, AND DISPOSAL INFORMATION

Storage: Store away from sources of direct heat and moisture. Seal containers with a dry nitrogen blanket and keep closed when not in use. Moisture contamination will evolve CO₂ and create pressure in closed systems.

Spills: Absorb on inert material. Transfer to open containers outside or in well-ventilated area. Soak with dilute ammonia hydroxide or water-alcohol mixture. Allow time for reaction to be complete before disposal.

Disposal: In accordance with any local, state and federal regulations regarding polymeric waste.

Environmental Information:

Environmental effects have not been determined.

VII. HEALTH RELATED DATA

Specific Hazard(s): Potential skin, eye & respiratory irritant.

First Aid Procedures: If eye contact occurs, flush with water for 15 minutes, get medical attention. For skin exposure, wipe off excess material, wash skin with rubbing alcohol and then soap and water. If redness or irritation persists, get medical attention. For inhalation move to fresh air, administer oxygen if needed, get medical attention. Wash clothing before reuse. Discard shoes if contaminated inside.

Toxicology Information: The major potential adverse effects of this compound are due to the residual (TDI) which has been shown to cause respiratory irritation and sensitization in certain individuals. TDI is also a severe skin & eye irritant.

Traces of residual TDI will range from approximately 0.02 to 4.0% depending upon polymer.

For further information, contact Uniroyal Industrial Toxicology Department. (203/723-3492)

ND: Not Determined

NA: Not Applicable

Date: Nov. 10, 1983

4.03 Submit a copy or reasonable facsimile of any hazard information (other than an MSDS) that is provided to your customers/users regarding the listed substance or any formulation containing the listed substance. Indicate whether this information has been submitted by circling the appropriate response.

Yes 1
No (2)

4.04 For each activity that uses the listed substance, circle all the applicable number(s) corresponding to each physical state of the listed substance during the activity listed. Physical states for importing and processing activities are determined at the time you import or begin to process the listed substance. Physical states for manufacturing, storage, disposal and transport activities are determined using the final state of the product.

CBI
[]

Activity	Physical State				
	Solid	Slurry	Liquid	Liquified Gas	Gas
Manufacture	1	2	3	4	5
Import	1	2	3	4	5
Process	1	2	(3)	4	5
Store	(1)	2	3	4	5
Dispose	1	2	3	4	5
Transport	1	2	3	4	5

SECTION 7 MANUFACTURING AND PROCESSING INFORMATION

General Instructions:

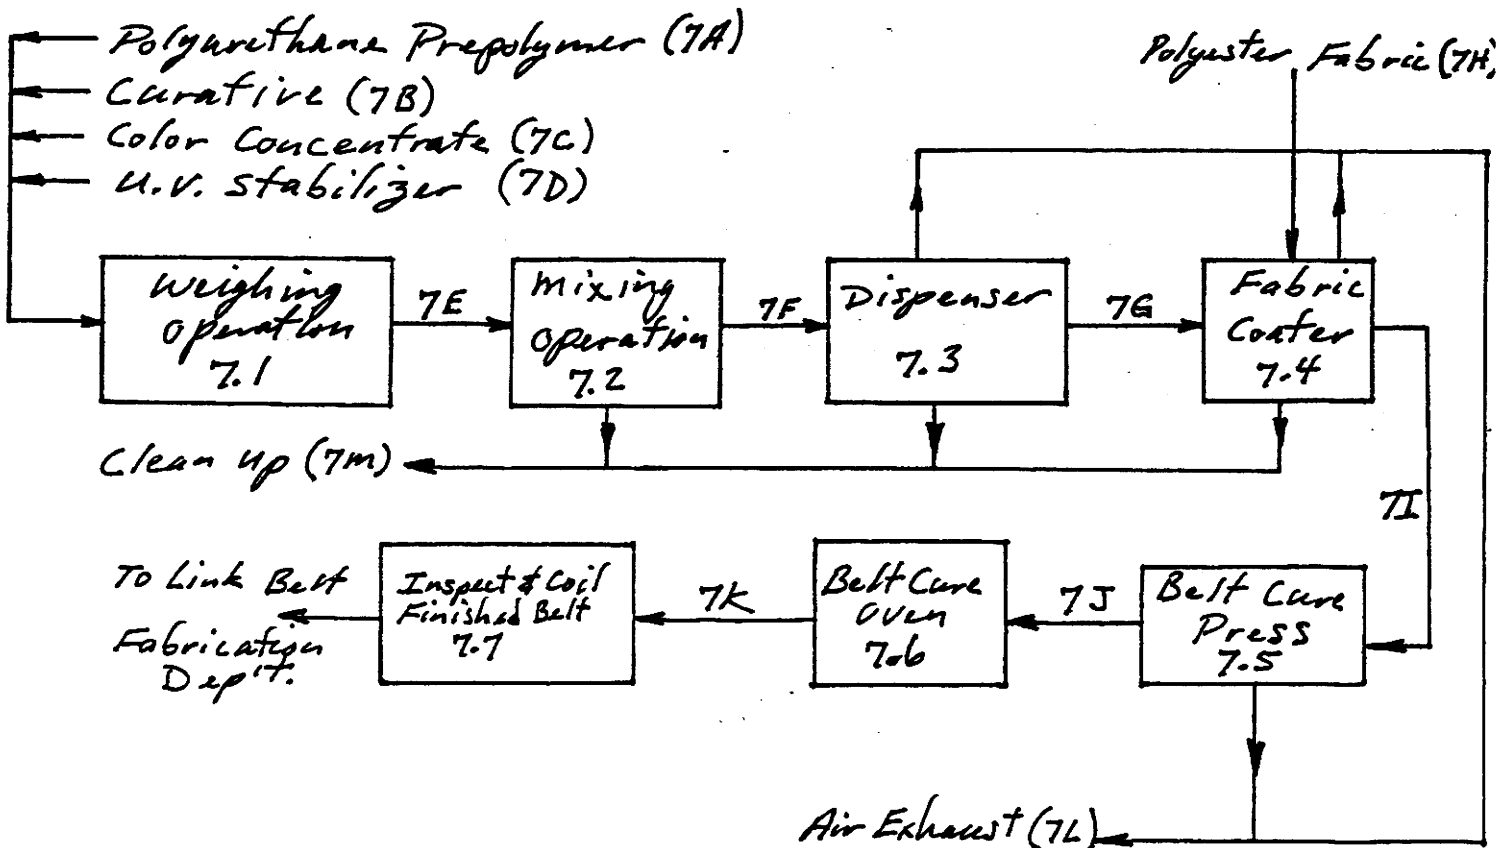

For questions 7.04-7.06, provide a separate response for each process block flow diagram provided in questions 7.01, 7.02, and 7.03. Identify the process type from which the information is extracted.

PART A MANUFACTURING AND PROCESSING PROCESS TYPE DESCRIPTION

7.01 In accordance with the instructions, provide a process block flow diagram showing the major (greatest volume) process type involving the listed substance.

CBI

☐ Process type Polyurethane Belt Casting Process

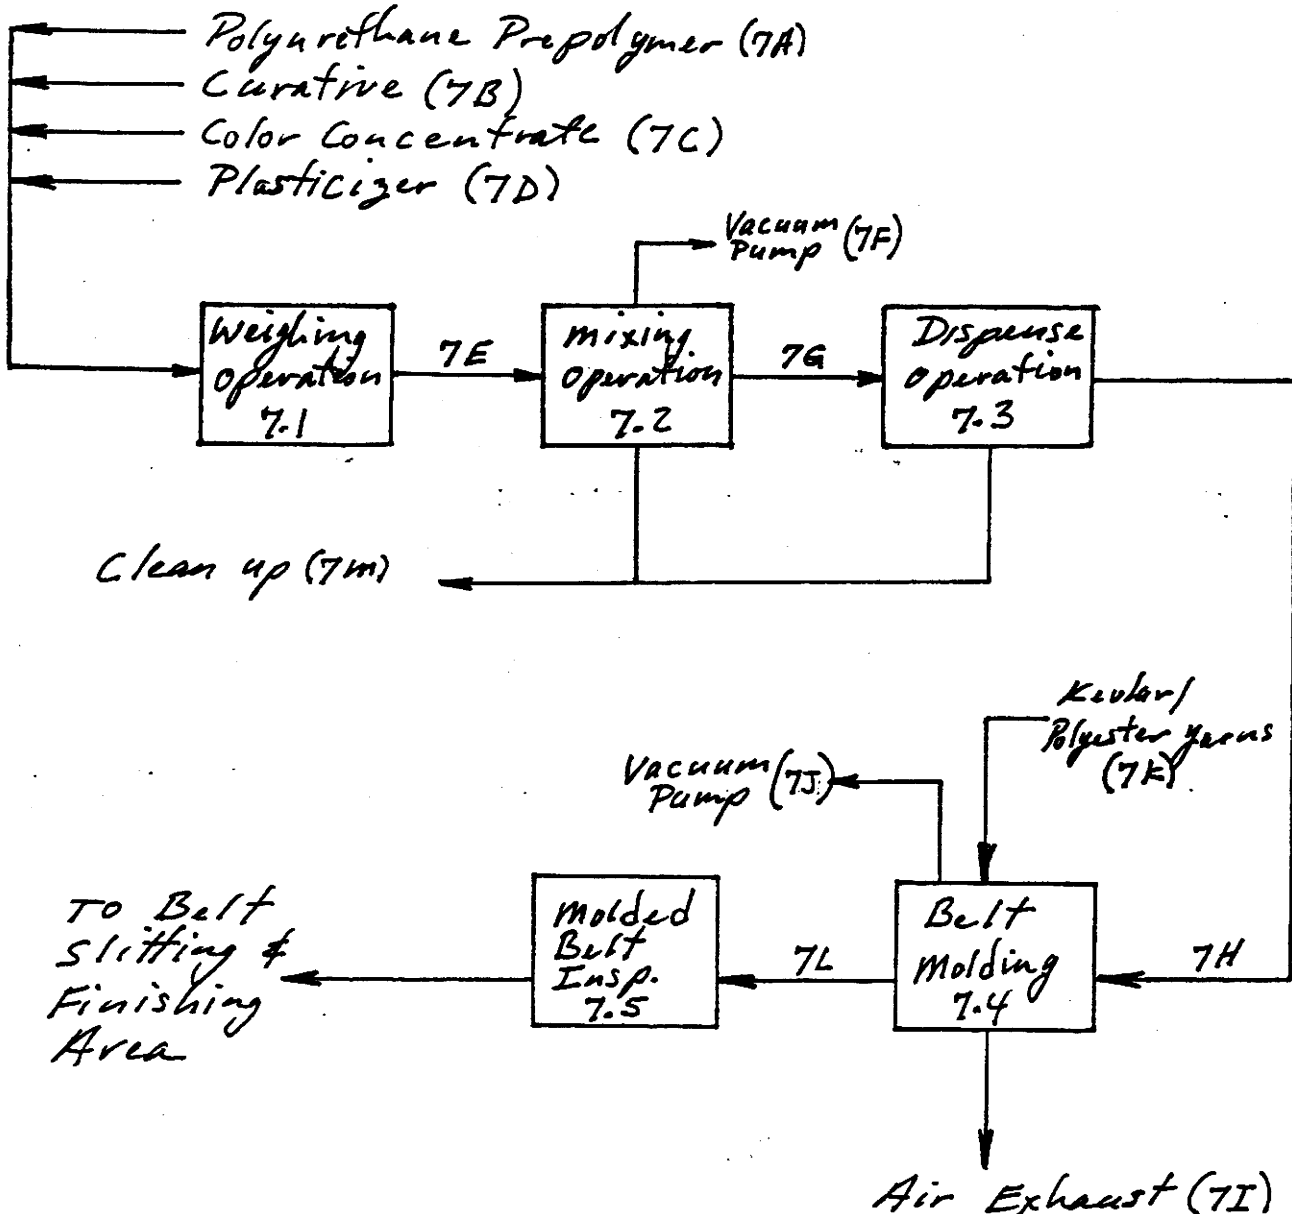

☐ Mark (X) this box if you attach a continuation sheet.

7.02 In accordance with the instructions, provide a separate process block flow diagram showing each of the three major (greatest volume) process types involving the listed substance.

CBI

☐ Process type Polyurethane Belt Molding Process

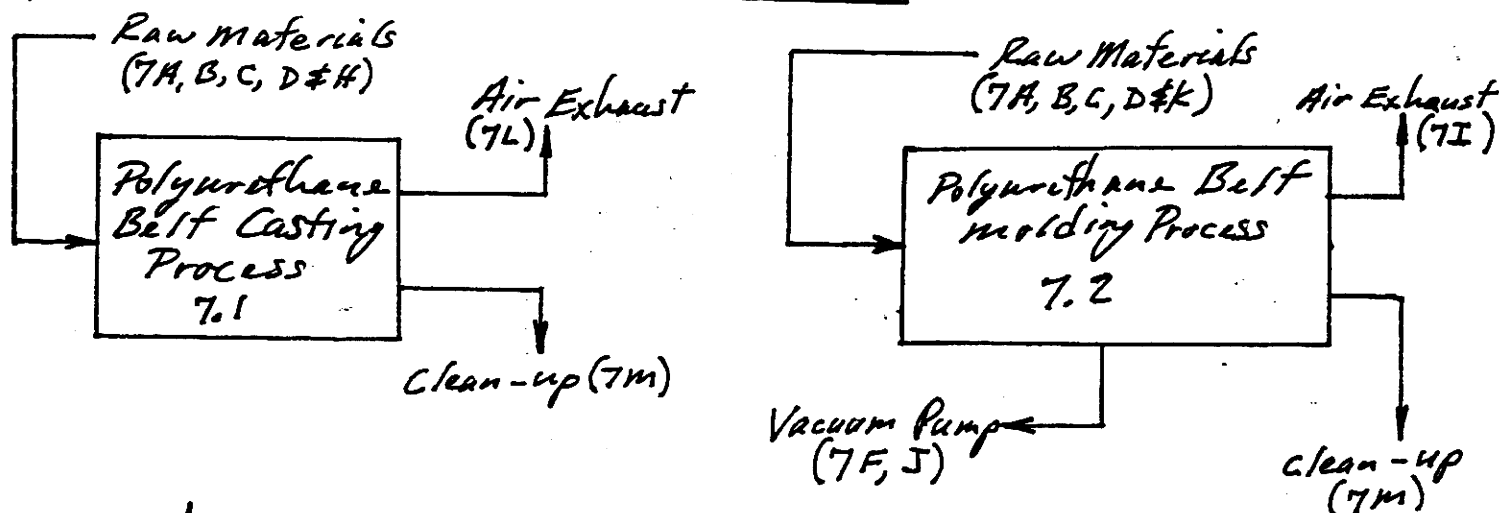

☐ Mark (X) this box if you attach a continuation sheet.

7.03 In accordance with the instructions, provide a process block flow diagram showing all process emission streams and emission points that contain the listed substance and which, if combined, would total at least 90 percent of all facility emissions if not treated before emission into the environment. If all such emissions are released from one process type, provide a process block flow diagram using the instructions for question 7.01. If all such emissions are released from more than one process type, provide a process block flow diagram showing each process type as a separate block.

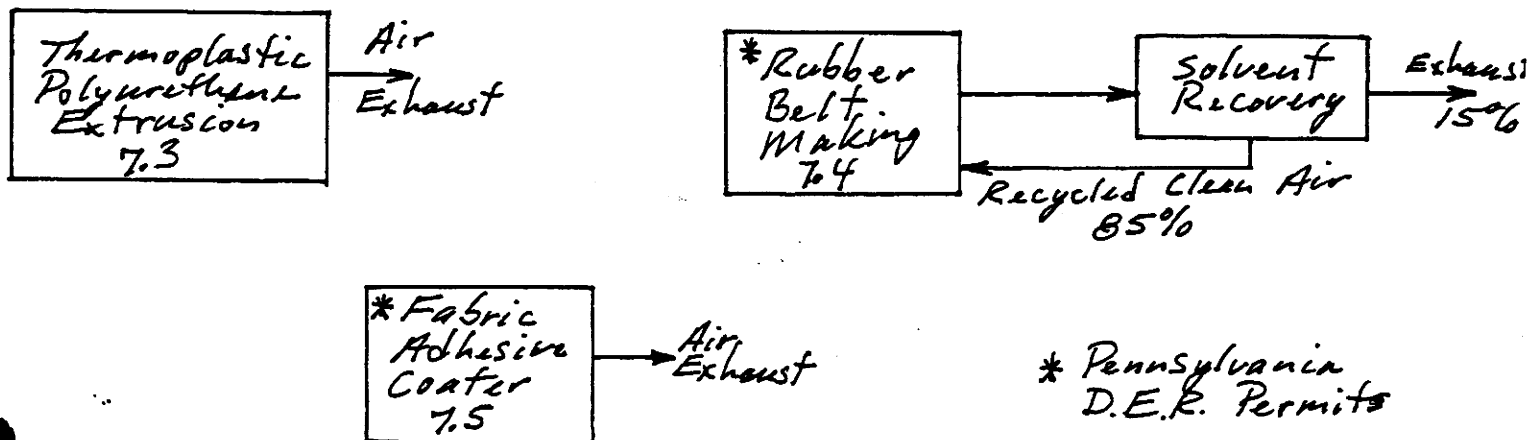

CBI

☐ Process type TDI Containing Processes & Other Plant Processes

└─ TDI Containing Processes ─┘

└─ "Non" TDI Containing Processes ─┘

☐ Mark (X) this box if you attach a continuation sheet.

7.04 Describe the typical equipment types for each unit operation identified in your process block flow diagram(s). If a process block flow diagram is provided for more than one process type, photocopy this question and complete it separately for each process type.

CBI

☐ Process type Polyurethane Belt Casting Process

Unit Operation ID Number	Typical Equipment Type	Operating Temperature Range (°C)	Operating Pressure Range (mm Hg)	Vessel Composition
<u>7.1</u>	<u>Digital Floor Scale</u>	<u>20 to 50</u>	<u>735</u>	<u>—</u>
<u>7.2</u>	<u>Mixer & Tank</u>	<u>50</u>	<u>735</u>	<u>UHMW Tank</u>
<u>7.3</u>	<u>Dispenser Tank</u>	<u>50</u>	<u>735</u>	<u>UHMW Tank</u>

7.06 continued below

☐ Mark (X) this box if you attach a continuation sheet.

7.06 (continued)

¹For each additive package introduced into a process stream, specify the compounds that are present in each additive package, and the concentration of each component. Assign an additive package number to each additive package and list this number in column b. (Refer to the instructions for further explanation and an example. Refer to the glossary for the definition of additive package.)

Additive Package Number	Components of Additive Package	Concentrations (% or ppm)
<u>1</u>	<u>Color Concentrate (E)(W)</u>	<u>2.5%</u>
	<u>U.V. Stabilizer (E)(W)</u>	<u>0.4%</u>
<u>2</u>	<u>Color Concentrate (E)(W)</u>	<u>2-5%</u>
	<u>Plasticizer (E)(W)</u>	<u>0% to 15%</u> <i>Depending on product to be made</i>
<u>3</u>		
<u>4</u>		
<u>5</u>		

²Use the following codes to designate how the concentration was determined:

A = Analytical result
E = Engineering judgement/calculation

³Use the following codes to designate how the concentration was measured:

V = Volume
W = Weight

☐ Mark (X) this box if you attach a continuation sheet.

PART A RESIDUAL TREATMENT PROCESS DESCRIPTION

8.01 In accordance with the instructions, provide a residual treatment block flow diagram which describes the treatment process used for residuals identified in question 7.01.

CBI

☐ Process type Polyurethane Belt Casting Process

(7L) Exhaust Air 3,000 CFM (E)

(7m) clean-up one time each week for color changes and week end shut down.

methylene chloride is used for clean up, some evaporation to air and some to distillation unit for recycling.

Residual liquid polyurethane is moisture cured to a solid.

☐ Mark (X) this box if you attach a continuation sheet.

8.02 In accordance with the instructions, provide residual treatment block flow diagram(s) which describe each of the treatment processes used for residuals identified in question 7.02.

CBI

☐ Process type Polyurethane Belt Molding Process

(7I) Air Exhaust 4,000 CFM (E)

(7F, J) Vacuum Pump Exhaust. 20 CFM (E)

Pump only emits TDI during injection mold fill, 30 seconds per 15 minutes.

(7m) Clean up — same type clean up as in 8.01 but without the weekend shut downs.

The mix and dispense process is a closed system that will not cure up over the week end. Therefore the cleaning is less frequent than in 8.01.

☐ Mark (X) this box if you attach a continuation sheet.

PART B RESIDUAL GENERATION AND CHARACTERIZATION

8.05 Characterize each process stream identified in your residual treatment block flow diagram(s). 9.21 Do you have a written medical action plan for responding to routine or emergency exposure to the listed substance?

Routine exposure

Yes 1

No 2

Emergency exposure

Yes 1

No 2

If yes, where are copies of the plan maintained?

Routine exposure: _____

Emergency exposure: _____

9.22 Do you have a written leak and spill cleanup plan that addresses the listed substance? Circle the appropriate response.

Yes 1

No 2

If yes, where are copies of the plan maintained? _____

Has this plan been coordinated with state or local government response organizations? Circle the appropriate response.

Yes 1

No 2

9.23 Who is responsible for monitoring worker safety at your facility? Circle the appropriate response.

Plant safety specialist 1

Insurance carrier 2

OSHA consultant 3

Other (specify) _____ 4

☐ Mark (X) this box if you attach a continuation sheet.

SECTION 10 ENVIRONMENTAL RELEASE

General Instructions:

Complete Part E (questions 10.23-10.35) for each non-routine release involving the listed substance that occurred during the reporting year. Report on all releases that are equal to or greater than the listed substance's reportable quantity value, RQ, unless the release is federally permitted as defined in 42 U.S.C. 9601, or is specifically excluded under the definition of release as defined in 40 CFR 302.3(22). Reportable quantities are codified in 40 CFR Part 302. If the listed substance is not a hazardous substance under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) and, thus, does not have an RQ, then report releases that exceed 2,270 kg. If such a substance however, is designated as a CERCLA hazardous substance, then report those releases that are equal to or greater than the RQ. The facility may have answered these questions or similar questions under the Agency's Accidental Release Information Program and may already have this information readily available. Assign a number to each release and use this number throughout this part to identify the release. Releases over more than a 24-hour period are not single releases, i.e., the release of a chemical substance equal to or greater than an RQ must be reported as a separate release for each 24-hour period the release exceeds the RQ.

For questions 10.25-10.35, answer the questions for each release identified in question 10.23. Photocopy these questions and complete them separately for each release.

PART A GENERAL INFORMATION

10.01 Where is your facility located? Circle all appropriate responses.

CBI

- ☐ Industrial area ①
- Urban area 2
- Residential area 3
- Agricultural area 4
- Rural area 5
- Adjacent to a park or a recreational area 6
- Within 1 mile of a navigable waterway 7
- Within 1 mile of a school, university, hospital, or nursing home facility ⑧
- Within 1 mile of a non-navigable waterway ⑨
- Other (specify) _____ 10

☐ Mark (X) this box if you attach a continuation sheet.

10.02 Specify the exact location of your facility (from central point where process unit is located) in terms of latitude and longitude or Universal Transverse Mercader (UTM) coordinates.

Latitude 40 ° 9 , 30 "

Longitude 76 ° 24 , 0 "

UTM coordinates Zone _____, Northing _____, Easting _____

10.03 If you monitor meteorological conditions in the vicinity of your facility, provide the following information.

Average annual precipitation 50 inches/year

Predominant wind direction W

10.04 Indicate the depth to groundwater below your facility.

Depth to groundwater 15 meters

10.05 For each on-site activity listed, indicate (Y/N/NA) all routine releases of the listed substance to the environment. (Refer to the instructions for a definition of CBI Y, N, and NA.)

☐

On-Site Activity	Environmental Release

7.02 7.4	✓	.225	200	400	.01	.001	400	1
_____	_____	_____	_____	_____	_____	_____	_____	_____

¹Use the following codes to designate physical state at the point of release:

G = Gas; V = Vapor; P = Particulate; A = Aerosol; O = Other (specify) _____

²Frequency of emission at any level of emission

³Duration of emission at any level of emission

⁴Average Emission Factor — Provide estimated (\pm 25 percent) emission factor (kg of emission per kg of production of listed substance)

PART C FUGITIVE EMISSIONS

10.13 Equipment Leaks -- Complete the following table by providing the number of equipment types listed which are exposed to the listed substance and which are in service according to the specified weight percent of the listed substance passing through the component. Do this for each process type identified in your process block or residual treatment block flow diagram(s). Do not include equipment types that are not exposed to the listed substance. If this is a batch or intermittently operated process, give an overall percentage of time per year that the process type is exposed to the listed substance. Photocopy this question and complete it separately for each process type.

CBI

☐ Process type Poly urethane Ball Casting Process
 Percentage of time per year that the listed substance is exposed to this process type 45 %

Equipment Type	Number of Components in Service by Weight Percent of Listed Substance in Process Stream					Greater than 99%
	Less than 5%	5-10%	11-25%	26-75%	76-99%	
Pump seals ¹						
Packed					<u>1</u>	
Mechanical					<u>1</u>	
Double mechanical ²						
Compressor seals ¹						
Flanges						
Valves						
Gas ³						
Liquid					<u>1</u>	
Pressure relief devices ⁴ (Gas or vapor only)						
Sample connections						
Gas						
Liquid						
Open-ended lines ⁵ (e.g., purge, vent)						
Gas					<u>1</u>	
Liquid					<u>1</u>	

¹List the number of pump and compressor seals, rather than the number of pumps or compressors

10.13 continued on next page

☒ Mark (X) this box if you attach a continuation sheet.

10.13 (continued)

² If double mechanical seals are operated with the barrier (B) fluid at a pressure greater than the pump stuffing box pressure and/or equipped with a sensor (S) that will detect failure of the seal system, the barrier fluid system, or both, indicate with a "B" and/or an "S", respectively

³Conditions existing in the valve during normal operation

⁴Report all pressure relief devices in service, including those equipped with control devices

⁵Lines closed during normal operation that would be used during maintenance operations

10.14 Pressure Relief Devices with Controls -- Complete the following table for those pressure relief devices identified in 10.13 to indicate which pressure relief devices in service are controlled. If a pressure relief device is not controlled, enter "None" under column c.

[]

[illegible]

¹Refer to the table in question 10.13 and record the percent range given under the heading entitled "Number of Components in Service by Weight Percent of Listed Substance" (e.g., <5%, 5-10%, 11-25%, etc.).

²The EPA assigns a control efficiency of 100 percent for equipment leaks controlled with rupture discs under normal operating conditions. The EPA assigns a control efficiency of 98 percent for emissions routed to a flare under normal operating conditions

☐ Mark (X) this box if you attach a continuation sheet.

PART C FUGITIVE EMISSIONS

10.13 Equipment Leaks -- Complete the following table by providing the number of equipment types listed which are exposed to the listed substance and which are in service according to the specified weight percent of the listed substance passing through the component. Do this for each process type identified in your process block or residual treatment block flow diagram(s). Do not include equipment types that are not exposed to the listed substance. If this is a batch or intermittently operated process; give an overall percentage of time per year that the process type is exposed to the listed substance. Photocopy this question and complete it separately for each process type.

CBI

☐ Process type Polyurethane Belt Molding Process
 Percentage of time per year that the listed substance is exposed to this process type 95 %
